Veterinary Recovery Mate Monitor

The ZM-5 Veterinary Recovery Mate is a pocket-sized, hand-held monitor designed to provide continuous monitoring from admission to discharge. This compact device tracks essential parameters, including ECG, SpO2, NIBP, respiration (RESP), pulse rate, and internal temperature, with optional EtCO2. Its portability and versatile functionality make it the perfect choice for veterinary teams to monitor patients throughout induction and recovery.

Ideal for use in dental suites, recovery cages, and other under-monitored areas, the ZM-5 ensures continuous body temperature monitoring for enhanced patient safety and comfort. With the ZM-5, it's never been easier to monitor patients before, during, and well into recovery.
